CO_2 emissions per capita vs. GDP per capita, 2022

Our World in Data

This measures CO_2 emissions from fossil fuels and industry[1] only – land-use change is not included. GDP per capita is adjusted for inflation and differences in the cost of living between countries.

Data source: Global Carbon Budget (2023); Population based on various sources (2023); Bolt and van Zanden - Maddison Project Database 2023

Note: GDP per capita is expressed in international-$[2] at 2011 prices.
